

# TK ISHA REHMAN

Operational Excellence | Business Excellence | Data Analytics  
+971-50-1621981 | ishatk.rehman@gmail.com | Dubai, UAE

## PROFESSIONAL SUMMARY

Operational Excellence and Business Analytics professional with 5+ years of experience across aviation, travel, and gaming/IT sectors. Skilled in designing Power BI dashboards, building forecasting and financial models, and translating operational and KPI data into insights that improve reporting speed, process efficiency, and decision-making. Proven track record of leading cross-functional initiatives, reducing reporting cycle times, and driving measurable productivity and revenue gains. Seeking to bring strong data analysis, stakeholder management, and process-improvement expertise to an Operational Excellence, Data Analyst, or Business Excellence role.

## CORE SKILLS

Data Analysis & Reporting | KPI Analysis & Dashboard Design | Power BI & Tableau | SQL & Snowflake | Forecasting & Financial Modeling | Budgeting & Cost Tracking | Business Planning & Strategic Planning | Process Improvement & Operational Excellence | Project Planning & Coordination | Stakeholder Management | Data Visualization | Performance Reporting (Weekly/Monthly/Quarterly)

## PROFESSIONAL EXPERIENCE

### Lead, Operational Excellence

2024 – 2025

*dnata (Emirates Group), Pakistan — Aviation / Airline*

- Designed and deployed 4 Power BI dashboards connected to Snowflake, cutting reporting time by 30% and earning the Bronze Najm Award for Excellence.
- Built a centralized reporting portal spanning operations, finance, and commercial teams via iCargo, streamlining report access and accelerating decision-making; recognized with the Appreciation Najm Award for Innovation.
- Rolled out the Inaam and Shaheen employee recognition schemes, lifting Cargo Operations team productivity by 25% and strengthening adherence to safety protocols.
- Automated manual weight-scale data capture within the CMS system, achieving 100% data accuracy and eliminating recurring operational errors.
- Gathered business requirements and used Snowflake for backend data validation to resolve aircraft turnaround and ULD tracking delays, reducing turnaround coordination time by 15% and improving inventory tracking accuracy and cargo damage rates.
- Defined and tracked operational KPIs across 5 airports to monitor business growth and ensure departments met or exceeded performance targets.

### Deputy Manager – Business Excellence

2021 – 2024

*Gerry's Visa, Karachi, Pakistan — Travel / Tourism*

- Tracked cost against budget and monitored project progress to strengthen financial controls and reporting accuracy.
- Led the formulation and rollout of policies, processes, and frameworks that improved employee motivation and productivity.
- Implemented 8+ new reporting dashboards, expanding data visualization capabilities and improving the speed and quality of management decision-making.
- Prepared and presented monthly, quarterly, and annual performance reports directly to the COO.
- Implemented an Oracle-based reporting portal and supporting processes that cut the daily reporting cycle by over 40%.
- Built a comprehensive monthly forecasting model that reduced the forecast cycle time from 2 weeks to under 4 days.
- Modeled and presented incentive-plan financial structures to executive management, contributing to record-breaking revenue generation.

### Data Analyst (Part-time)

2021 – 2023

*Big-Wolf Games, USA — IT & Gaming*

- Produced data-driven insights and reports using Power BI and Tableau to support strategic business decisions.
- Identified new business use cases for data insights, contributing to a 30% increase in revenue.
- Coordinated 4+ cross-departmental initiatives to align data processes with strategic objectives.
- Analyzed and presented performance data using SQL, Amplitude, and Tableau.
- Built database components — including tables, views, and materialized views — using SQL to strengthen data management.

## EDUCATION

### Bachelor of Engineering, Telecommunications Engineering

NED University of Engineering and Technology — October 2020 | GPA: 3.7

## CERTIFICATIONS

- Foundations: Data, Data, Everywhere — Google
- SQL for Data Science — UC Davis
- Analyze Data using Pivot Tables & Crosstabs in Google Sheets — Coursera
- Machine Learning Pipelines with Azure ML Studio — Coursera
- Python Data Structures — University of Michigan
- Programming for Everybody — University of Michigan
- Mathematics for Machine Learning: Linear Algebra — Imperial College London
- An Intuitive Introduction to Probability — University of Zurich
